UI/UX [Portfolio](#)

Designed and delivered my personal portfolio in coordination with web developer.

Wells Fargo App

Usability research was done on features that are required by users that the app does not have at the moment. Followed Design principles, designed, implemented, and delivered a complete addition of a very desired online banking app.

Leveraged tools following industry standards to expose assets and design mockups to developers.

Deliverables include design of wireframes, low, mid and high-fidelity mockups, user flow diagrams, creation of assets, custom icon creation, and interactive prototypes.

Duolingo

Design a new comprehensive feature for the Duolingo app. The feature was chosen based on public feedback for the app found on the iOS App Store.

Deliverables include design of wireframes, low, mid and high-fidelity mockups, user flow diagrams, creation of assets, custom icon creation, and interactive prototypes.

Achieve it

The birth of a personal progress and user management app.

Conceptual and UI design of the app.

Created mood boards, user personas, and testing frameworks.

Deliverables include design of wireframes, low, mid and high-fidelity mockups, user flow diagrams, creation of assets, custom icon creation, and interactive prototypes.
